Nursing Assessment in Video

The best-selling series from the world's top provider of nursing training videos

High-quality patient care begins with good assessment, but acquiring the necessary skills and experience to make accurate patient assessments can be complicated. No textbook can convey the healthy body sounds heard during auscultation, nor show a live example of a patient demonstrating abnormalities during a visual field test. Fortunately, video resources address these challenges and more, giving nursing students a reliable way to observe nuanced procedures and patient interactions before practicing in a clinical setting.

Nursing Assessment in Video is an online database that provides anywhere, anytime access to the best-selling assessment series of training videos from Medcom Trainex, acclaimed provider of nursing education programs worldwide. Each title features leading industry experts providing hands-on demonstrations and step-by-step instructions in key assessment areas. And because all content was produced since 2012, users can depend on the collection to deliver the most accurate, up-to-date information available.

Topical Coverage

Titles in *Nursing Assessment in Video* include:

- *The Respiratory System*
- *The Key to Quality Patient Care*
- *The Musculoskeletal System*
- *The Digestive System*
- *The Integumentary System*
- *Head and Neck, Mouth and Throat*
- *Eyes, Ears, and Nose*
- *The Male Genitourinary System*
- *Head-to-Toe Assessment*
- *The Female Genitourinary System*
- *The Cardiovascular System, Part 1: Anatomy and Subjective Data*
- *The Cardiovascular System, Part 2: Objective Data*
- *The Nervous System, Part 1: Anatomy and Subjective Data*
- *The Nervous System, Part 2: Objective Data*

Functionality for Teaching and Learning

Whether your nursing program is on campus or online, the delivery format of *Nursing Assessment in Video* makes it simple for users to access the content they want when and where it's most convenient. Even if your program already uses films in class, switching from DVDs to online streaming video has countless advantages:

- Students and professionals can review skills at their own pace before exams and certifications.
- Faculty can select just the most important clips from videos, put them into a playlist, then share them in class or for homework.
- Unlimited users can view films at the same time from the library, their home computer, or their mobile device.
- Scrolling transcripts alongside each video help visual learners process and understand and make sure users never miss a word.

Publication Details

Nursing Assessment in Video is an online collection available to libraries and educational institutions worldwide via subscription or one-time purchase of perpetual rights. No special setup or software is required—all you need is an Internet connection. For more information, to request a free trial, or for a price quote, please email sales@alexanderstreet.com.
