# Education in Video Series

Every student of education knows that reading about education theory in the abstract is a dramatically different experience than applying that knowledge in the classroom. Effective teaching delivery requires an in-depth understanding of expression, tone, body language, and other skills that can be difficult to glean from textbooks and theory alone.

*Education in Video* tackles this challenge by providing the first-ever online video series developed specifically for training and developing teachers. This multi-volume collection is growing to contain more than **1,650 hours of video** that gives education students a reliable way to observe the intricacies of behavior that define effective teaching styles.

Video content includes demonstrations, lectures, documentaries, and primary-source footage of students and teachers in actual classrooms. In-depth and special-topic videos enable teachers to expand their knowledge and link abstract theories to real-world situations. The collection is global in scope and includes a wealth of ready-to-use teaching tools, including discussion guides, assessment checklists, and themed playlists.

## Education in Video: Volume I

**"Definitely recommended." –*The Teacher Trainer Journal***

*Education in Video: Volume I* contains 1,300 hours of content, and features many of the teaching videos most frequently used in university-level education programs. Select titles include:

- *Cooperative Learning and Culture* (Harry K. Wong Publications)
- *Thoughtful Reading: Teaching Comprehension to Adolescents* (Stenhouse)
- *Successful Teaching Practices in Action: New Media in the Classroom* (Teachers Network)
- *Inclusion, I.E.P. and Special Needs Laws: What Teachers Should Know* (Learning Seed)
- *Race in the Classroom: The Multiplicity Of Experience* (The Derek Bok Center for Teaching and Learning)
- *Teaching Reading 3-5 Workshop: Classroom Program: Close Reading for Understanding* (Annenberg Learner)

Also included in *Volume I* is the complete run of *Teachers TV*. Created by the United Kingdom's Department of Education in 2008, *Teachers TV* features more than 3,000 concise instructional videos featuring engaging and practical in-classroom demonstrations and commentary from teachers, administrators and other educational experts. Key topics covered include teaching global issues and citizenship, behavior issues, assessment, administration techniques, social issues, and special education.

## Education in Video: Volume II

New in 2014, *Education in Video: Volume II* is growing to 350 hours of brand new video covering contemporary subjects and emerging teaching approaches. Content expands upon topics covered in *Volume I*, and places an emphasis on special needs, English as a second language, and the US Common Core standards. Highlights in *Volume II* include:

- *The Common Core Standards in the Writers Workshop* (Kim Gerodomis)
- *Differentiated Instructional Strategies for Reading in the Content Areas* (Corwin Press)
- *Math Tools in Action: Manipulatives* (Stenhouse)
- *Preschooler Observation PLUS! Social & Emotional Development* (Learning Seed)
- *Stuttering in Children: Speaking of Courage* (Chip Taylor Communications)

## Publication Details

*Education in Video* is a multi-volume online collection of streaming video available to libraries via annual subscription or one-time purchase, with pricing scaled to your institution. Volumes are available individually or as a series. For more information, a trial, or a price quote, email [sales@alexanderstreet.com](mailto:sales@alexanderstreet.com).
