Environmental Studies in Video

Environmental Studies in Video is an online collection designed to address the needs of one of the fastest growing academic fields. The collection directly confronts the most compelling questions faced in contemporary society by bringing together seminal documentary films and powerful footage from diverse sources around the globe.

At completion, *Environmental Studies in Video* will contain **500 hours of film** covering all realms of environmental studies, particularly ethics, policy, economics, law, sociology, planning, and environmental science. Films were produced from 1970 to the present, and address specific topics including alternative energy, pollution control, eco-design, sustainability, farming and agriculture, the food industry, waste issues, and climate change.

This internationally focused collection highlights issues from **dozens of countries**. Users can examine environmental factors across Antarctica (*Antarctica: The Game on Ice*), Africa (*Greening Africa*), and in specific countries including Egypt, Bangladesh, China, and France.

Noteworthy titles include:

- **Architects of Change**—A Ciné Fête series profiling the pioneers who are seeking innovative solutions to protect our planet's future.
- **Arctic Territories**—A series portraying Canada's efforts to protect the Arctic in the face of threatening environmental and political forces.
- Award-winning films from **Josh and Rebecca Tickell**, including *The Big Fix* (Official Selection, Cannes Film Festival), *Fuel* (Best Documentary, Sundance Film Festival), and *Freedom*.
- **Sustainable Futures**—A Switch International series examining the impact of human actions on people, animals, plants, and landscapes around the world.
- Additional major broadcast series *Nature Inc.* and *Green Matters*

Other key features:

- Synchronized, searchable transcripts run alongside each video.
- Clip-making functionality.
- Permanent URLs let users cite and share materials.
- LTI functionality allows for embedding of videos within learning management systems.
- Limited public performance rights included.

Publication details

The database is cross-searchable with all other Alexander Street Video collections, and will be relevant to students in engineering, the health sciences, anthropology, international affairs, economics, urban planning, and architecture.

Environmental Studies in Video is an online collection available to academic, public, and school libraries worldwide via subscription or one-time purchase of perpetual rights. No special setup or software is required—all you need is an Internet browser.
