Search
Multiple Ways to
Discover Great Content

Collection pages highlight new resources, editor's picks, and discipline-specific tools. Content is curated by subject matter specialists. Quick reference videos help you navigate user tools.

Editor's selections and clips. Over 100,000 playlists and hundreds of clips created by editors, faculty, and subject matter experts provide superior annotations and help you quickly locate the most relevant content.

**How to search for content:**

Keyword search:
If you know what you're looking for, start with the Quick Search bar at the top of your screen. Here you can search by keyword and filter by media type (text, audio, video).

Advanced search:
Use Advanced Search to reveal suggested search fields and terms that will help you get more specific results.

Filters: The search results page will automatically display filters to help you refine and narrow your search further. Type "Mozart" into a music collection and you'll see music-oriented filters—such as work/opus, performer, instrument played, and time period. (Results will vary depending on the collection and type of search being conducted.)

Search within: Still seeing too many results? Use the "Search Within" feature to drill down into your results even more. This will allow you to keyword search within the results you've already received.

3 Reference/Text Tools
for Learning and Sharing

Shareable playlists.
Add all of your favorite documents and document passages into an online playlist, then easily share the link, or slide it seamlessly into any syllabus or LMS.

Easy citation export.
Export, download, and email full, accurate citations in APA, Chicago, and MLA formats.

Contents.
Use the Contents section to navigate through longer texts. Click on any spot in the Contents section to jump to that part of the text.

Multi-language user interface.
Text, bibliographic details, annotations, and other content can be translated into 65 languages using fully integrated Google Translate.

Text clip/annotation.
Use the Annotate/Clip tool to bookmark and make notes on text documents. You can view or share your annotations by adjusting the visibility settings under each annotation.

Multi-page view.
View text documents or scores on a single page, or on multiple pages. In dual-page view, you can go forward to the next page or back to the previous page by clicking your mouse, or using the arrows on your keyboard.
